

## Local Children Receiving Dental Care at Daycare/Preschool

We're excited to announce the extension of our dental program to include young children ages 1-4. Comfortable dental assessments and fluoride treatments will now be made available right where the children are, so parents no longer need to travel for dental care.

Our licensed team of professionals is specially trained to work with children and ensure a safe and comfortable environment. The program is funded in part by donations and grants, which means there is no charge for students to participate. However, insurance will be billed to recoup some of the cost.

Children will also have fun brushing Ollie's teeth

Please feel free to reach out to us at 906.630.6197 or [updentalhygiene@gmail.com](mailto:updentalhygiene@gmail.com) if you have any questions.

I give my child permission to have a dental assessment, plus a fluoride varnish treatment
